Holds 11 utility patents. Former VP and board member. Taught university engineering. Led extensive workshops and served as COVID-19 counselor with the SBDC during the pandemic.	Business strategic planning; marketing; business financials; human resources; business startups; custom ChatGPTs.

EMPOWERING MENTORS WITH AI TOOLS

This program is the result of a collaborative effort of 37 volunteers across all SCORE regions. Focused on enhancing the mentor/client relationship, this program unlocks AI use for mentors, demystifying terms and giving real world examples of using AI in the mentoring process.

WHY TRAIN NOW ON AI?

Market Needs

- Top Education Topic Requested in the Volunteer Engagement Survey
- AI is a massively transformational technology
- Our clients will expect us to have the knowledge
- AI can substantially enhance the mentor/client relationship
- Substantial growth of small businesses driven by AI

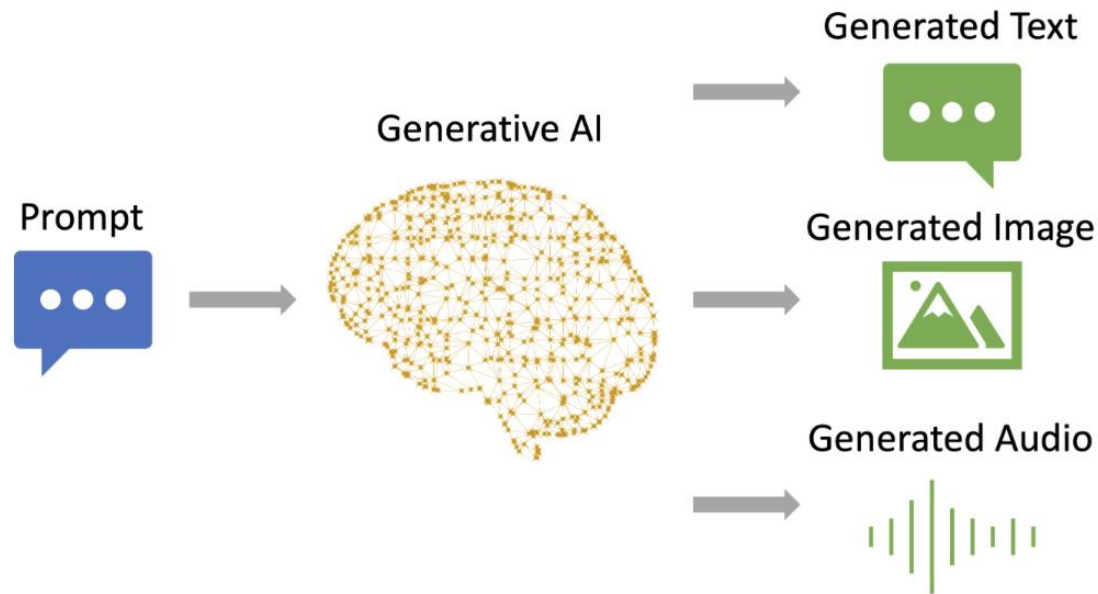

How AI Helps

- Save time on prep, follow-up, and admin tasks
- Bring faster, more tailored insights to every session
- Support clients in unfamiliar industries with greater confidence
- Standardize processes and resources across your chapter

DEFINITIONS: AI vs. GENERATIVE AI

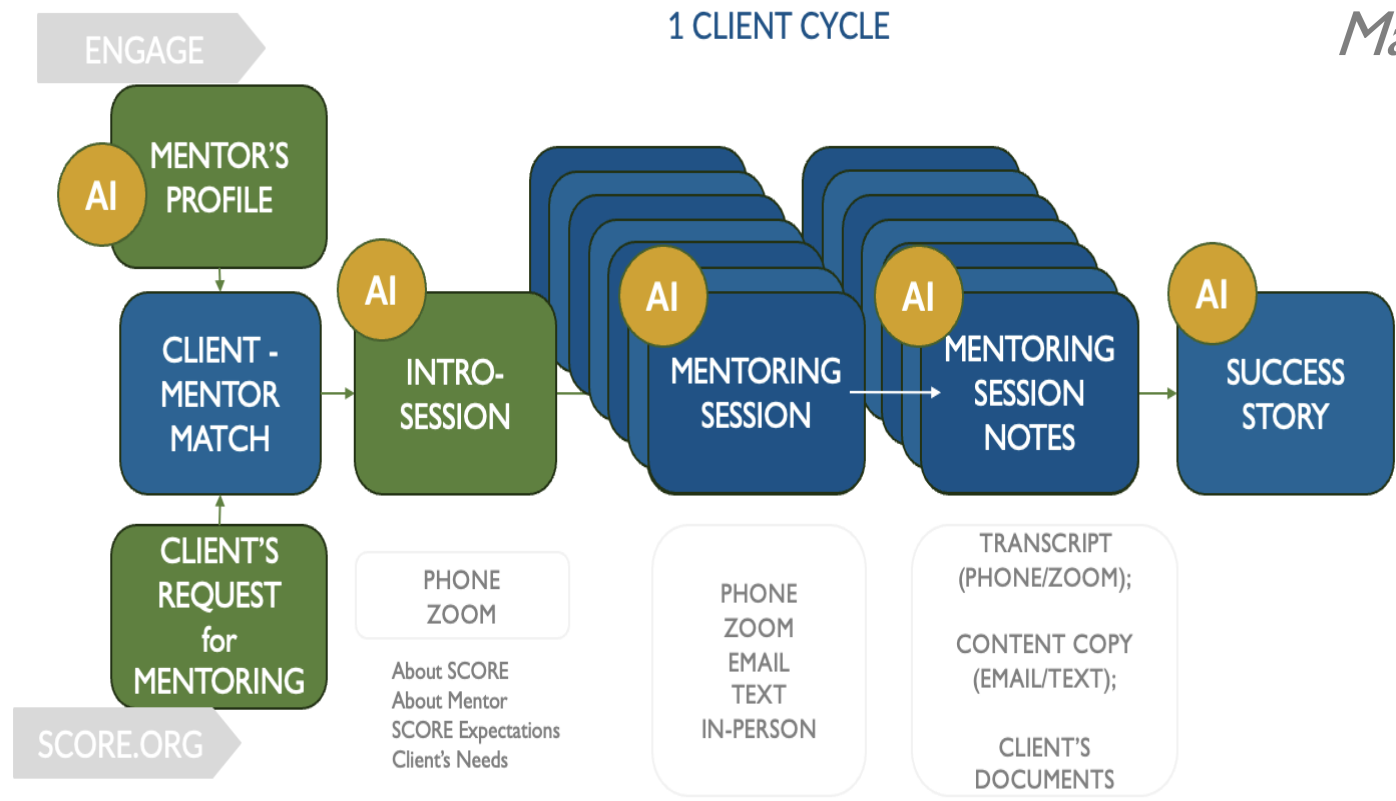

AI: A field of computer science that focuses on creating machines that can think and act intelligently.

Generative AI: AI that can understand and output human languages, and understand and create multiple forms of media such as text, audio and video.

Note: In this presentation we may use “AI” and “generative AI” interchangeably but we’re referring to generative AI.

AI AND MENTORING: OPPORTUNITIES THROUGHOUT THE PROCESS

Many steps in mentoring processes can be empowered by AI and by the AI tools developed at SCORE

DEMO #1: Business Models – Google Gemini

Three ASU recent graduates bought a 32 passenger bus at an auction. Prepare three concept models to launch a business based on location and a profitable shuttle service.

- Prepare five plans of services for utilization of this shuttle bus
- Using the plan with the highest profit potential:
- Prepare a five year financial spreadsheet
- Build into the plan the purchase of a second bus as a backup for vehicle rotation
- Prepare a break even analysis
- Write A Complete Business Plan
- Prepare a franchise plan for other venues
- Pick a name for these shuttle tours with ten candidates giving the ideas from hotels/airport to destination
- Which name would be best for millennia's
- Write a franchise brochure for the firm aimed a Millennia's
- Write a 90 second startup pitch for investors at a travel workshop

This is our prompt – Lets See What We Get!

We will discuss the prompts as a model of using Gemini for business plan discussions with clients. Everyone will be emailed the session transcript as a word file, shuttletranscript.docx.

DEMO #2 - SCORE CUSTOM GPTs

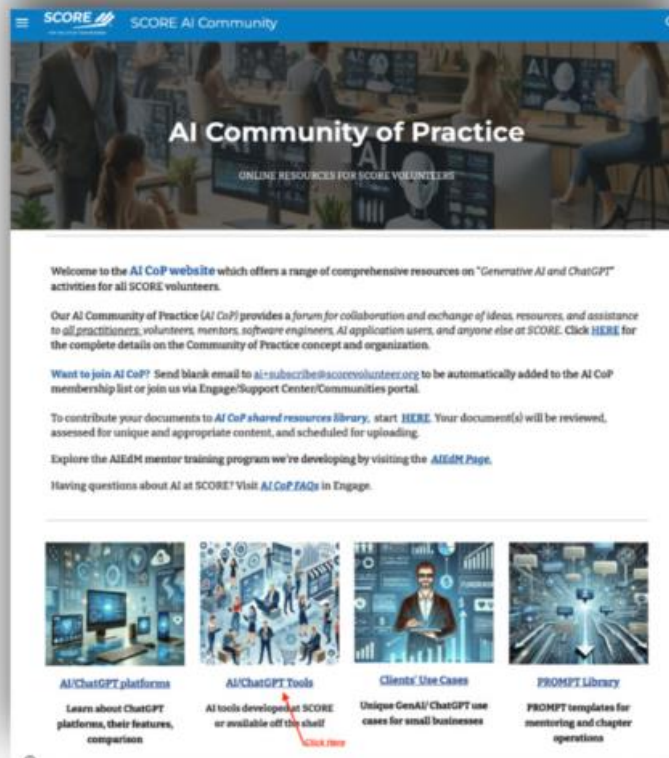

*Definition: Within ChatGPT, a **GPT** is a way to wrap up an individual's or organization's unique knowledge to create customized tools tailored to specific needs.*

SCORE GPTs are purpose-built AI tools developed using SCORE IP to support mentoring. They help mentors and clients collaboratively assess startup and business growth ideas—before committing significant time or capital. Structured to simulate the lens of an investor, lender, or grant reviewer, the tool walks users through ideation, research, and vetting

- **SCORE GPT - Unfamiliar Industry Guide**
- **SCORE GPT - Startup Vetting Guide**

Generative AI Tools

Generative AI can assist in different aspects of small businesses from data analysis and customer service to content creation and cybersecurity management.

GPTs created with SCORE specific methods & IP

These tools are best used in the Web version of ChatGPT and initiated using the "conversation starter" buttons below the GPT name. Yes, they will work in the free tier of ChatGPT, but OpenAI places limits on the amount of use and file uploads per user per day in the free tier. Keep this in mind.

These tools will work in the mobile and app (macOS) versions of ChatGPT, but the user must enter, "Begin," "Go," "Start" or similar comments in the message box to start the GPT since the apps don't display conversation starter buttons. These GPTs will NOT train ChatGPT on any data provided.

SCORE Mentoring Best Practices Assistant

Target Audience: Every mentor at SCORE

Description: This tool represents SCORE Mentoring Handbook with ability to find relevant information with ease and clarity. This handbook includes the SLATE methodology as well as all the processes and procedures to carry out an effective mentoring session and best serve our clients. It is a one-stop source for all SCORE mentors, both new and existing. [built by Charlie Morris]

Industry Insight Guide / Unfamiliar Industry Explorer [updated]

Target Audience: Mentors

Description: Intended to allow mentors to become familiar with industries prior to mentoring a new client. Queries the user for an industry area and generates an analysis of the industry using John Trenary's "Unfamiliar Industry" prompt set. This is a highly interactive GPT. [updated 6.14.2025]

Mentoring Session Planner - SCORE

9 Purpose: Generate personalized mentoring agendas & discussion topics.

Interactive GUIDE Mentoring - SCORE

10 Purpose: Deliver structured, growth-oriented guidance.

Decision Coach - SCORE

11 Purpose: Facilitate structured decision-making.

AI-Powered Mentoring Success

WHY GENERATIVE AI MATTERS FOR MENTORS

- Helps mentors provide data-driven insights to clients
- Automates repetitive tasks, freeing up time for strategic mentoring
- Enhances client outreach and engagement through personalized fast fact-driven responses
- Offers Generative AI as a brainstorming partner to do the online research
- Empowers marketing and CRM tools
- Saves your time in content generation: meeting notes, newsletters, marketing, fundraising, etc
- Optimizes and standardizes mentoring workflow and recordings
- Improves quality of mentoring

AI ETHICS AND SECURITY AT SCORE

It's crucial to approach **Generative AI** with a mindful and cautious approach.
Here's a breakdown of simple rules for safe AI usage:

1. Protect Your Private Information

- Avoid Sharing Sensitive Data
- Understand Data Usage

2. Verify and Validate Outputs

- Don't Trust Outputs Blindly
- Critical Evaluation
- Human Oversight

3. Be Mindful of Copyright and Ethical Concerns

- Copyright Awareness
- Ethical Considerations
- Understand Terms of Service

4. Strengthen Digital Security

- Use SCORE Approved Platforms
- Strong Passwords
- Regular Updates
- Be Cautious of Phishing

These rules also apply to your regular Internet browsing.

By adhering to these simple rules, you can significantly reduce the risks associated with using Generative AI and enjoy its benefits more safely.

Follow **SCORE Policies on AI Security and Ethics**
